dmitri.menglet@gmail.com

unifer.su

Unifer is a revolutionary novel nutrition supplement to increase blood iron, hemoglobin and blood ferritin.

A 14-day course significantly replenishes blood iron in deficiency patients.

ADVANTAGES:

No side effects, neutral flavor. The aqueous solution of Fe^{2+} antioxidant stabilized complex quickly transits the aggressive environment of the stomach, and is effectively transported to the ingestion area – the enterocytes' (cells of the small intestine) surface.

Thus, the low dose of iron (10mg) in Unifer achieves high efficiency and bioavailability without side effects associated with many with higher dose iron per os preparations. Confirmed by clinical studies.

Approved for children from 3 years of age and pregnant women.

MLT LLC (MEDICAL LABORATORY EQUIPMENT LLC)

haemoblock.ru

Unique technologies for major surgery: hemostasis and lymphorrhea management.

Production of innovative medical products for surgery.

Pul-Sar LTD produces the world's first and only preparation for effective lymphorrhea management.

Lymphoblock® is used to prevent and stop lymphorrhea during radical lymph node dissection (lymphadenectomy), during mastectomy, vascular surgery, chylothorax in children, etc.

Haemoblock® – An effective aqueous local hemostatic composition with an antiseptic effect. It is designed to stop diffuse, capillary, and parenchymal bleeding during and after open surgical and endoscopic procedures, as well as trauma injury. The solution has a neutral pH, it does not damage biological tissues, prevents the development of wound infection, and accelerates healing by up to 40%. It provides reliable intra-organ hemostasis virtually regardless of plasma composition. The composition is transparent and does not obscure the surgical field, allowing a surgeon to improve the view of the surgical field during its intra-operational use.

Our products Haemoblock and Lymphoblock are designed for safe and reliable hemostasis and effective lymphorrhea management. Both products are non-toxic, non-cauterizing and easy to apply directly to the wound surface or on any suitable substrate (e.g. gauze swabs).

RITM OKB ZAO THE SCENAR COMPANY

Russia, 630117,
Novosibirsk,
PO box 492

+7 383 25 25 163

vbmarket@vector-best.ru

vector-best.com

Vector-Best stands as Russia's foremost innovator and producer of comprehensive technological solutions for laboratory diagnostics. Today, the company's diverse portfolio encompasses enzyme immunoassays (ELISA), real-time PCR, clinical chemistry, point-of-care testing, and coagulation analysis.

Currently manufacturing 200,000 kits monthly, Vector-Best collaborates with over 6,000 laboratories worldwide and partners with more than 40 international distributors spanning Europe, South Asia, and North Africa.

The company's commitment to public health is reflected in a product range exceeding 400 ELISA kits and over 300 PCR kits. Vector-Best develops and manufactures advanced ELISA and PCR-based diagnostics targeting blood-borne, zoonotic, and vaccine-preventable infections, as well as genetic polymorphism analysis and the detection of parasitic infestations. Supporting animal health, Vector-Best also offers approximately 200 PCR and ELISA kits for both companion animals and livestock, including specialized assays for detecting Newcastle disease virus, infectious bursal disease, bovine leukemia virus, and more.

Beyond diagnostics, Vector-Best equips laboratories with automated solutions and comprehensive customer support. The company actively engages with the global scientific community through participation in major international exhibitions and conferences, and it provides personalized on-site training for its valued clients. Driven by research excellence and a deep understanding of laboratory medicine, Vector-Best is dedicated to creating cutting-edge products and fostering enduring partnerships with both its clients and collaborators.
